## Face Mounted Emergency Exit Signs to meet **NZBC F8**

Since April 2012 the Building Code Acceptable Solution for emergency exit signage (F8/AS1) has allowed photoluminescent ("PL") exit signs to be used wherever "illuminated exit signs" are required.

There are strict performance requirements specified in F8/AS1 that make sure the PL signs will meet all the requirements of the NZ building code. To the best of our knowledge, Ecoglo signs are the only PL signs available in New Zealand that are bright enough to meet F8/AS1.

Ecoglo's Emergency Exit Signs are manufactured and tested to comply with F8/AS1. They are also designed to be used in engineered solutions to meet building codes in Australia, New Zealand and any performance based jurisdiction around the world.

Ecoglo's high visibility and durability ensure that the signs can be installed in any environment, indoors or outdoors. As long as there is sufficient natural or artificial light to charge the signs then a system can be engineered to meet building code performance specifications.

Code: VF7901BS - Single Sided Sign with Base

Footpath signs are comprised of a Sturdy Plastic Base which can be water filled and a 4mm ACM sign blade, 600mm wide x 800mm High. They can be printed single or Double sided and can be reflective if required.

To order email your design to [sales@in2safesigns.co.nz](mailto:sales@in2safesigns.co.nz)

## ANTI-SKID FLOOR GRAPHICS

Anti-skid Floor Graphics are for use when there is no space for conventional signage. They are supplied as a self adhesive sticker and have a very strong adhesive which will adhere to all regular floor surfaces including carpet. The surface is a non-slip and is suitable for high traffic areas. We can print any of the signage designs in this catalogue as Floor Graphics and also any custom Designs & Advertising as required.
